Panama Canal Fun Fact

The Panama Canal in 1974 raises the toll rates for the first time since they were not braking even. Excavation of the Canal was equal to digging a trench 10 feet deep by 55 feet wide from California to New York.

Did You Know?

Holland America Line spends millions of dollars every year to reduce fuel consumption by upgrading our systems. For example, most of our ships used to run two engines while docked in port to generate the needed electricity. Efficiencies we have achieved now enable us to meet our in port requirements with only one engine.
